ENVIRONMENTAL PROTECTION

Our wastewater processing system combined with traditional chemical treatment and modern biological treatment technology ensures that the wastewater discharge can comply with government laws and regulations.

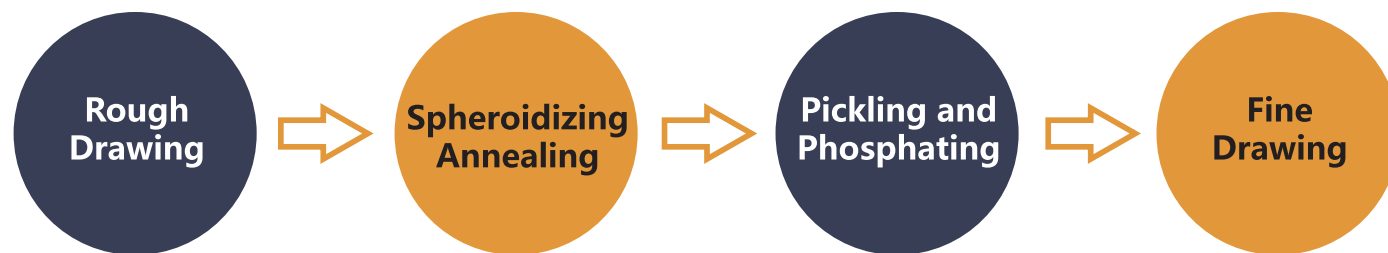

PRODUCTION EQUIPMENT

The production of fine wire includes four stages of rough drawing, spheroidizing annealing, pickling phosphating and fine drawing. The products are mainly based on cold heading, alloy steel and other advanced spheroidizing annealing fine wire, which is widely used in fasteners, automobiles, heavy machinery, electrical and electronic screws and civil construction screws.

PRODUCT APPLICATION

The products are used in high strength automobile standard parts, mechanical construction standard parts, bearing steel and so on. The main products are carbon steel, boron steel, alloy steel spheroidizing wires (C1022A, SS410, SS304, SS31635K, 45K, 40Cr, 10B21, 20MnTiB, ML15AL).
